

PRODUCT Nº: 1.313

PROQUIL-B CLEANER-POLISHER

CHARACTERISTICS

PROQUIL-B is a product with **cleaning** and **polishing** effect, which has been designed for being used on non-porous surfaces. In general, it can be applied on any type of surface that can be in contact with water.

It's formulated based on non-ionic tensoactives, humidifying products and carefully chosen and emulsified silicon derivatives. Its special composition allows light dirt cleaning and polishing of surfaces, all in an only operation, giving high gloss and dust-repelling properties. At the same time, its very fine protective film keep the treated surfaces clean for longer times.

Its special composition does not damage painted, lacquered or varnished surfaces, giving them high gloss degree.

USES

The use of **PROQUIL-B** is especially recommended in cleaning and polishing **mirrors, chrome-plated, gilded surfaces, glazed wall tiles, lacquered furniture, metacrylate**, etc.; in general for cleaning and polishing all surfaces where it can be used as cleaning product.

It should be noticed its use in automobiles for polishing **bodyworks, glasses, chrome-plated bumpers, plastic seats**, etc.

METHOD OF USE

PROQUIL-B is designed to be used pure, as it's supplied. Shake the product before using. The most suitable application is by spraying on the surface to be cleaned, small amounts of **PROQUIL-B**. (we recommend, while applying **PROQUIL-B**, the use of our triggersprayer **POLYSPRAYER** which, due to their excellent spraying system, allows important savings of product, making the application easier at the same time)

Spread the amount of **PROQUIL-B** over the surface to be cleaned, forming circles, using a clean cloth which does not leave ooze. Finally, if necessary, pass a clean and dry shomoy cloth, rubbing slightly, until observing how instantly appears high gloss on the surfaces.

In general, an only application is enough, but, if desired, several coats can be applied in order to get better gloss.

When using **PROQUIL-B** for polishing car bodyworks, it's recommended to apply as mentioned above, with the precaution of applying in closed places and at room temperature. Never in the sun.

NOTES FOR USE

It's not recommended to mix **PROQUIL-B** with other products, unless a previous test has been made; in general it's not considered necessary.

It's convenient to shake the product before using in order to get a completely homogenous product.

Never use **PROQUIL-B** on surfaces which are going to be painted afterwards.

PRECAUTIONS

Do not swallow. Keep out of the reach of children. Avoid contact with eyes.

PACKAGING

PROQUIL-B is packaged in 30, 50, 60 and 208 litres plastic containers.

ADVANTAGES

- CONTAINS NO ABRASSIVES
 - EASY USE
- ITS FOAM CLEANS AND PROTECTS AT THE SAME TIME
 - RESULTS IN CLEAN AND POLISHED SURFACES
- SURPRISING RESULTS ON NON-POROUS SURFACES
