

PRODUCT Nº. : 1.316

PROQUIL-CRISTAL ALCOHOLIC PERFUMED GENERAL CLEANER

CHARACTERISTICS

PROQUIL-CRISTAL is a liquid, blue coloured, lightly scented general cleaner, which has been formulated with an alcoholic base and with high contents in humidifying active principles, degreasers and tensoactives which give **PROQUIL-CRISTAL** a high cleaning power on any type of non-absorbing surface. Its fast drying and the absence of non-volatile components in its composition, get a fast cleaning with no remains, providing a high level of final gloss.

USES

Due to its special composition, **PROQUIL-CRISTAL** is especially recommended in cleaning processes in:

- General glasses.
- Tiled surfaces.
- Baths, wash basins and bathrooms.
- Varnished surfaces.
- Mirrors and metal-plated surfaces.
- Non-porous surfaces in general.

Its high concentration and high degreasing and humidifying power allow the use of aqueous solutions of **PROQUIL-CRISTAL** keeping the effective cleaning power. It's very effective when used in the windscreen cleaner liquid tanks in cars, mixed with water at 5-10 %.

METHOD OF USE

PROQUIL-CRISTAL may be used pure, as it's supplied, but it can also be used diluted with water. The most suitable dilution proportions will depend on the degree and type of dirt and on the desired vaporisation speed. In very dirty surfaces it's recommended to use the product in more concentrated solutions, which will also have a high vaporisation speed, so reducing the drying time.

It's recommended to use the product by spraying, using suitable devices or triggersprayers such as our POLYSPRAYER, which help get better final results and product savings, increasing the rentability.

Spray the area to be cleaned and pass afterwards a clean and dry cloth leaving no remains. Drying is not needed.

NOTE: The most recommended dilution rate to keep a fast drying depends on the room temperature. So in warm climates the dilutions can be higher than in cold climates. A moderate dilution has no great influence in the cleaning power of the product.

PRECAUTIONS

Do not swallow. Keep out of the reach of children. Alcoholic product; keep the containers tightly closed and far from heat sources.

PACKAGING

PROQUIL-CRISTAL is packaged in 30 and 60 litres original, non-reusable containers.

ADVANTAGES

- Allows dilutions with water
- Concentrated general cleaner.
- Does not leave remains. Provides high gloss.
- High cleaning power on non-absorbing materials.
