

PRODUCT Nº: 1.350

PROQUIL-PRB

CLEANER FOR GRAFFITI MADE WITH PEN OR BALL-PEN ON NON-POROUS PAINTED SURFACES

CHARACTERISTICS

PROQUIL-PRB is an alkaline, liquid product, with yellow colour and characteristic odour, which is totally soluble in water; due to its special composition and humidifying power, removes remains of inks, ball-pens, spray, pens, etc. It's a product which helps in removing the more and more frequent graffiti made on non-porous surfaces such as metal elements, galvanized plates, plastic designs, etc.

USES

PROQUIL-PRB is especially recommended for cleaning most of the graffiti made on non-porous surfaces, on previously painted or galvanized plastic or metal surfaces with pens or ball-pens; it removes the graffiti keeping the paint, or galvanized coating of the surfaces where the graffiti had been made.

Removing of graffiti on horizontal or vertical signalling covered with reflective films, testing previously that the reflexion factor has not been damaged by the graffiti and won't be damaged while cleaning.

METHOD OF USE

Spray **PROQUIL-PRB** pure, as it's supplied, with a polysprayer, on the areas with graffiti and rub lightly the surface with a soft hair brush or a synthetic wool. Rinse the surface with plenty of water and finally pass a damp and clean cloth.

For graffiti on white and glossy paints, sometimes it's recommended to use **PROQUIL-PRB** diluted with water, taking special care of the rinsing operation to avoid as much as possible the final yellowish tones. Anyway and on any type of paint, before starting the cleaning operations, it's recommended to make previous tests.

PRECAUTIONS

Harmful by inhalation, if swallowed and in contact with the skin. Irritating to respiratory system. Avoid contact with the eyes or skin. Use suitable gloves.

PACKAGING

PROQUIL-PRB is packaged in 10, 25 and 60 litres non-reusable plastic containers.

ADVANTAGES

- VERY UNEXPENSIVE
- EASY TO USE, QUICK AND EFFICIENT.
- GREAT HELP FOR GRAFFITI REMOVING.
