

PRODUCT N°: 1391

PROQUIL-ORANGE DEGREASING-CLEANER BASED ON NATURAL SOLVENTS

CHARACTERISTICS

PROQUIL-ORANGE is a new concept in cleaning and degreasing products, leaving behind previous concepts of products based on strong contents in alkalis, high concentrations on oil derivatives solvents or compositions based on chlorinated products.

PROQUIL-ORANGE could be defined as a "natural" industrial cleaner since its cleaning properties are mainly due to its contents in monocycle terpenic hydrocarbons, natural solvents extracted from citrics, biodegradable, with a vegetable origin.

PROQUIL-ORANGE due to its high cleaning and grease solvent power, is especially recommended when removing difficult greases, oils and carbon stains on concrete, metal and every type of hard surfaces which can be in contact with water.

APPEARANCE:	Clear liquid
COLOUR:	Slightly orange
ODOUR:	Citric.
HUMECTANT POWER:	Excellent.
PHOSPHATES:	Free.
RINSING:	Excellent.
EMULSION:	Fast.
BASIC COMPONENTS:	Natural solvents, emulgents

USES

Hereunder there are certain examples of the most frequent uses and the approximate doses:

<u>TYPE OF DIRT</u>	<u>CONCENTRATION</u>	<u>RECOMMENDED METHOD</u>
Ink removing	1:3/1:10	Immersion
Greases and oils	1:5/1:20	Soaking, cleaning with steam equipment.
Cutting oils, presswork, stamping, etc.	1:15/1:30	Machine or hand washing
General dirt, blood, grease, etc.	1:15/1:30	Pressure cleaning equipment
General dirt in factories	1:30/1:50	Hand or pressure equipment cleaning
Non-cured paints	1:4/1:6	Hand or after washing
Grease traps	pure - 1:3	Added directly to grease traps
Carbonized greases	1:10/1:20	Hand washed.
Rubber or soot remainings	1:10/1:30	Steam cleaning.

METHOD OF USE

PROQUIL-ORANGE can be used with any of the above mentioned methods, previously diluted in the most suitable proportion. Due to being liquid, the emulsions don't need high stirring rate.

Good ventilation is recommended, especially when using steam cleaning, in order to avoid removing of the vaporized solvent. In this case, the machine piping should be solvent resistant.

SAFETY ON MATERIALS

PROQUIL-ORANGE is safe on most of metals. On plastic or painted surfaces it's recommended to make a previous test.

PRECAUTIONS

Do not swallow. Keep out of reach of children. Avoid eye, skin or mucosae contact. In case of contact, wash with plenty of water.

PACKAGING AND STORAGE

PROQUIL-ORANGE is packaged in 25, 50, 100 and 208 litres non-reusable, metal containers.

ADVANTAGES

- Based on natural solvents.
- High degreasing and cleaning power
- Emulsifies easily in every type of water.
- Contains no alkalis or caustic solvents.
