## TECMA-GRAS

### HIGHLY CONCENTRATED ALKALINE DEGREASING CLEANER

#### CHARACTERISTICS

**TECMA-GRAS** is a powerful degreasing agent, formulated based on compounds with high humidifying, emulsifying and degreasing power. It's liquid, yellow-coloured and has a characteristic odour; due to its special composition, in an alkaline base, and its high solvent power, removes greases and other dirt present in ovens, fryers, fume removal hoods, kitchen equipment, etc.

**Health Registry Nº: 37.00207/M-03706**

#### USES

**TECMA-GRAS** is especially recommended for cleaning utensils and surfaces with high contents in grease at room temperature.

Quick and easy to use in cleaning fryers, fume removal hoods, metal filters, plates, utensils and tile walls in kitchens; in general, every type of surface with grease which can be in contact with alkaline product in aqueous base.

#### METHOD OF USE

**TECMA-GRAS** can be used pure or diluted with water between 10 and 50%, depending on the dirt present. In general, it's recommended to use **TECMA-GRAS** by spraying carefully on the surfaces to be cleaned. Apply a film of the product on the surfaces and let work for a few minutes. Remove the loose and solved grease using a damp cloth. Rinse finally with plenty of cold water.

In case of small utensils, it's recommended to use it by immersion in solutions of **TECMA-GRAS** in hot water, rinsing finally with plenty of water.

Its use is not recommended on aluminium surfaces or utensils.

#### PRECAUTIONS

Corrosive. Toxic if swallowed. Do not swallow. Keep out of the reach of children. Avoid contact with eyes or skin. Avoid breathing the spraying or vapours, using a suitable ventilation. It's recommended to wear gloves when using or handling.

#### PACKAGING

**TECMA-GRAS** is packaged in 10, 25 and 60 litres non-reusable plastic containers.
